

Certainty in an uncertain world

ORCHID
CELLMARK

While your organization can provide your employees with the best possible working conditions, they can still be vulnerable to inherent dangers over which you have no control. The statistics speak volumes – in 2004, there were 14 wars, 2562 terrorist attacks, 396 significant natural disasters, 216 serious transport crashes and 81 major industrial accidents. These days, no company can be completely protected from such occurrences.

What is ID-Secure™?

ID-Secure™ is a sophisticated and confidential DNA identity service that assists companies by obtaining and storing a unique DNA profile for each employee. The DNA profile that is generated is completely non-coding and will not provide any information a person would consider to be confidential (e.g. medical pre-dispositions, personality traits etc). ID-Secure™ can, when required, help your organization by significantly reducing the time and difficulty involved in establishing identity and in unforeseen circumstances, providing closure for relatives.

Orchid Cellmark

The DNA testing services of Orchid Cellmark have been used in the forensic and paternity arenas for more than 20 years by federal, state, regional and local government agencies and more recently, by many major North American corporations. We are proud to be associated with exceptional quality, reliability, customer service and innovation. ID-Secure™ is yet another example of an industry-leading initiative.

The Applications of ID-Secure™

DNA tests are extremely valuable in various sensitive and high risk situations when:

- There is loss of life and traditional identification means are insufficient
- Catastrophic occurrences result in missing or unidentifiable remains
- Employees are abducted and a search and rescue is necessary
- Investigating accidents or cases of negligence

In the past year, more than a dozen individuals have been identified using Orchid Cellmark's ID-Secure™ services

The Value of ID-Secure™

ID-Secure™ provides value to both the employer and employee. The benefits include:

- Quick and definitive determination of identity if there is a loss of life
- Answers and closure for families if the worst should happen
- Speedy resolution of insurance issues related to fraud or product liability
- Assistance in the location of an abducted employee
- Portrayal of your organization as responsible and forward-thinking
